

SHELF LIFE STUDY REPORT

Reference Number : EQNX:001:LAB:F:24:07:20107

PARTICULARS OF SAMPLE ANALYSED

Client Name: Hungry Q Frozen Foods LLP

Address: Unit no. 115, First Floor, Raheja Tesla Industrial Estate, Juinagar, Navi Mumbai, Maharashtra, India - 400 705.

Contact Person: Mahesh Wagh Manufacturing Date: 6-Feb-24

Sample Name: Classic Chicken Momos Date of Receipt : 4-Jul-24

Batch No : C/2024206 Storage Condition: Freezing (-18°C)

Packaging Material: Laminated Pouch Date of Report: 13-Aug-24

INTRODUCTION

The shelf life of a food is the time period within which the food is safe to consume and/or has an acceptable quality to consumers. By performing shelf life analysis; one can define accurate dates for products, ensuring that the quality remains acceptable and safe for consumers.

Shelf life depends on physical, microbiological and chemical processes taking place in the product when stored under recommended condition. Chemical changes include oxidation of food, change and loss in colour, change in pH, enzymatic deterioration. Physical tests assessed are moisture content, textural changes, breakage or clumping of food. Microbial assessment for absence of pathogenic microorganism as per regulatory standards is carried out. Apart from microbial and chemical shelf life of food products, sensory aspects of the food products like its flavor, texture and appearance for example play a vital role in consumer acceptability.

Client Name : Hungry Q Frozen Foods LLP.
Reference Number : EQNX:001:LAB:F:24:07:20107

Storage Condition : Freezing (-18°C)
Sample Name : Classic Chicken Momos
Mfg. Date :6-Feb-24

Conclusion:

The product, Classic Chicken Momos, was received in laminated pouch.
It was stored under freezing conditions (-18°C) for 6 months
It was tested for microbial, chemical and organoleptic parameters.
The results of analysis of the food sample **conform** to the recommended limits for the tested parameters only
and **the sample has shelf life of 6 months from date of manufacture.**
